Bengaluru, India

About me

Data analyst who builds Python and Apps Script pipelines, dashboards and business rules for sales leadership. At Unacademy I cut the incentive payout cycle from 10 days to 3, removed ~30 minutes of manual work from every hourly report and automated 6 recurring workflows.

Experience

UNACADEMY (PREPLADDER)

Jun 2026 – now

Data Analyst – PMO & Strategy

- Cut the incentive payout cycle by **70% (10 → 3 days)** with an Apps Script + OCR workflow that verifies KYC, calculates payouts and sends Finance a status report.
- Removed **~30 min of manual work per hourly report** with an 8-module Python pipeline (validation, logging, overlap guard) read by 50+ BDMs, 10 CHs, VP Sales, CBO and CEO.
- Automated **6 recurring workflows** (hourly report, KYC & payout, lead distribution, calling summary, spot incentives, SA updates) with validation and backups.
- Built run-rate forecasts (CRR, RRR, projection) with pace flags and a 70/15/15 incentive model, so reviews happen mid-month, not after close.
- Modelled **80K+ rows** from 3 databases; caught **72% of conversions** lacking a valid signup and a **39% target gap** before they reached leadership.
- Run workforce analytics for 50+ BDMs and 10 CHs: employee master, current hierarchy on all history, 57 → 69 headcount comparison.
- Led the NEET PG lead campaign across **233+ centres** with 60 BDMs and 10 CHs, from collection templates to follow-up tracking.

ODA CLASS

Jun 2025 – Mar 2026

Data Analyst & Master Teacher

- Cut cost per lead by **32% (₹675 → ₹457)**; tracked 200–300 weekly leads at 6%+ conversion (₹2.4L–₹3.6L weekly revenue).
- Taught **35,000+ students** with ~95% positive feedback; drop-off analysis led to a program reaching 2,000+ students per session.

Projects

BD Analytics Dashboard – Apps Script web app with 8 role-based views that replaced the manually shared Performance Tracker.

Automating Report Prep – the hourly reporting pipeline, on GitHub.

Sales Analytics Toolkit – OOP Python package with tests and a Panel dashboard on synthetic data.

Impact

10 → 3 days

incentive payout cycle

30 min → 0

manual work per hourly report

6

workflows automated

233+

centres in a campaign I led

32%

lower cost per lead (ODA)

Education

B.TECH, BIOTECHNOLOGY

NIT Durgapur | May 2025

Skills

Python: Pandas, OOP, Panel, Playwright, unittest

Data: SQL (joins, CTEs, window functions), data modelling, ETL, validation

BI: Apps Script web apps, HTML/JS dashboards, Power BI, Excel

AI: OpenAI API, OCR, AI-assisted development

Business: KPI design, forecasting, incentive & workforce analytics, stakeholder management

Leadership

General Secretary, Centre for Cognitive Activities: 10+ events, 300+ participants

Fest Secretary, Aarohan, NIT Durgapur

Subject Matter Expert, Collab Lab: content for 20,000+ learners
